

Forcing Updating Apps

1. Click on the APS App Catalog on your iPad's home screen.
2. Scroll until you find the app you want to update. The applications are listed in alphabetical order.
3. Click Installed next to the app you want to push the update too.

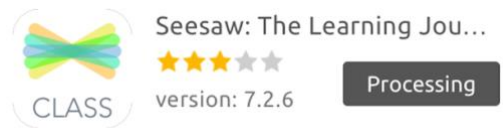

Confirm Installation

Install Seesaw: The Learning Journal?

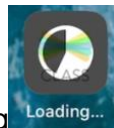

The app will download automatically and appear on your device.

Size: 284.1MB

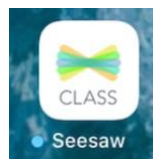

4. Click Install again.

5. You should see this now:
6. Tap the home button to get back onto the home screen. Your update should be starting now or even finished.

7. It will look like this if the app is updating

8. It will look like this if the app has been updated: (Note the blue dot next to the app name)
